WORK EXPERIENCE

Software Developer

InfoAxon Tech Ltd (~3 Year experience)

05/2021 - Present

Noida, India

Established in 2001, Info Axon provides IT services and IT consultancy.

Achievements/Tasks

- **Developed Web application** (for **insurance broker company**) via using **React JS** as front end and integrated **configuration-driven UI** seamlessly with **NODE JS** and embedded the application in **CMS (Liferay DXP)**.

Key responsibility: - Spearheaded the development of a configuration driven application, overcoming challenges related to the rearrangement of reusable components. Additionally, successfully integrated React with Liferay DXP, establishing robust data communication between the two platforms.

- **Developed Hybrid Mobile Application** from scratch (for **Real-estate**) via using **Ionic (React) framework**, published on Test flight (iOS beta testing), App store (iOS) and Play store (Android). **Key challenge** was in authenticating user in multiple ways via multiple services and thus providing users better security and tackling accessibility features and maintaining WCA AA level of accessibility. Implemented Deep/Universal Links for user's redirection.

- **Cross-Cutting Initiatives** (for **company benefits**) **Key responsibility** centered on the development of valuable and reusable React and Ionic components. Pioneered to creation of comprehensive library of reusable components, ensuring proper documentation and version control for seamless integration and collaboration.
